SAP BUSINESS DATA CLOUD
CAPSTONE PROJECT REPORT

SALES ANALYTICS DASHBOARD
ORDER-TO-CASH PERFORMANCE

Submitted to:

KIIT School of Computer Engineering

SAP Program Coordinator

Batch/Program: B. Tech. CSE 2023-27

Course: SAP DATA/Analytics Engineer

Certification: SAP Business Data Cloud

Submission Date: April 21, 2026

PROBLEM STATEMENT

The organization currently operates on SAP ERP with SD (Sales and Distribution) module managing all sales transactions. However, critical business insights remain hidden across multiple tables including VBAK (Sales Headers), VBAP (Sales Items), KNA1 (Customer Master), and MARA (Product Master).

OBJECTIVE

To build an interactive sales analytics dashboard that:

1. Displays Total Sales, Average Order Value, Overdue Amount, and Active Customers as key KPIs
2. Shows Sales by Region to identify top and bottom performing areas
3. Visualizes Payment Status distribution (Paid/Pending/Overdue)
4. Provides Monthly Sales Trend analysis for forecasting
5. Enables self-service analytics following SAP Business Data Cloud principles

DASHBOARD SUMMARY

Based on 60 sales orders from Jan-Apr 2026:

Metric	Value	Insight
Total Sales	$104,000	Strong performance
Avg Order Value	$1,740	Healthy basket size
Overdue Amount	$18,000	Cash flow risk (17%)
Active Customers	24	Growing base

SOLUTION APPROACH & TECH STACK

Architecture:

1. **Data:** CSV (Simulated SAP SD data).
2. **Modeling:** Power BI (Star Schema: Sales Fact + Customer/Product Dimensions).
3. **Visuals:** Power BI Desktop.

Key Features:

- **KPI Cards:** Total Sales, Avg Order Value, Overdue Alert, Customer Count.
- **Regional Sales:** North ($30.8K), West ($27.5K), South ($25.1K), East ($21.1K).
- **Payment Status:** 66% Paid ($69K), 17% Overdue ($18K), 17% Pending.
- **Monthly Trend:** Jan ($10K) to Apr ($50K) – *400% Growth*.

SCREENSHOTS

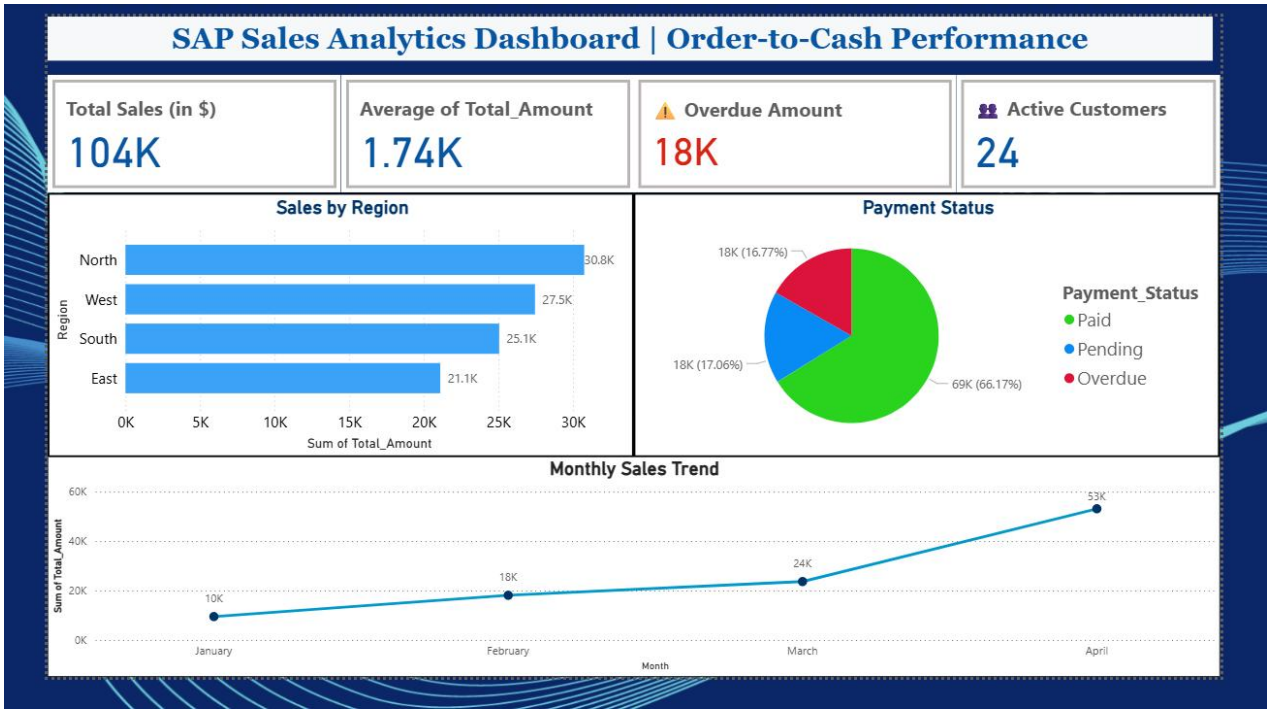

Figure 1: Full Dashboard

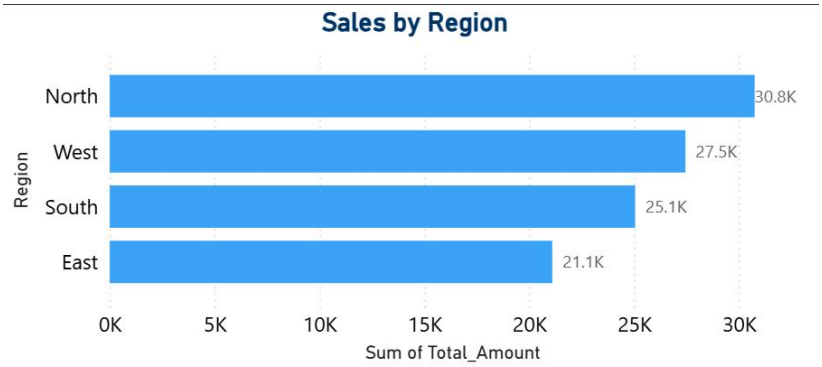

Figure 2: Sales by Region (North leads)

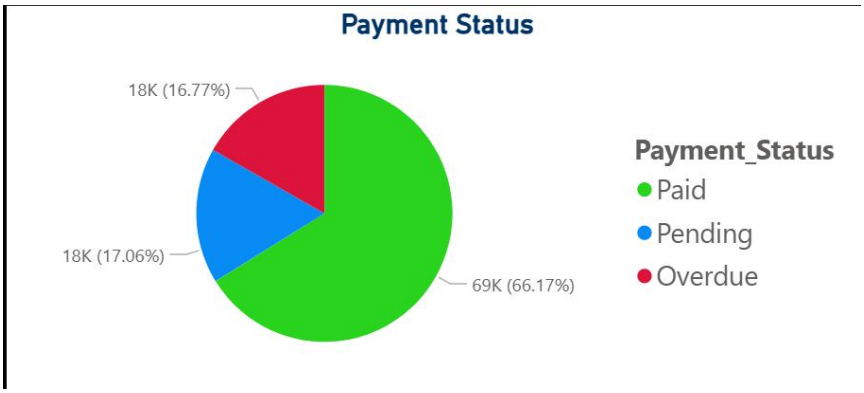

Figure 3: Payment Status (66% Paid)

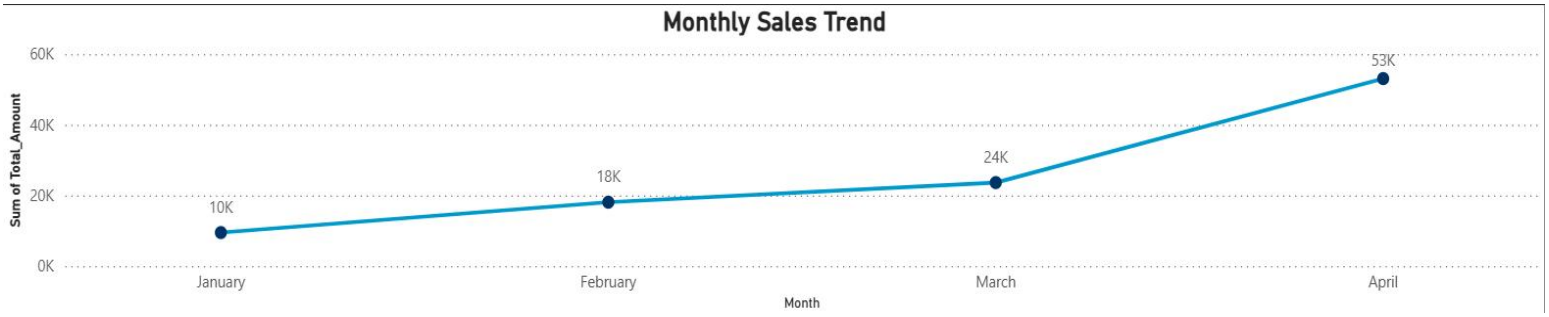

Figure 4: Monthly Trend (Peak in April)

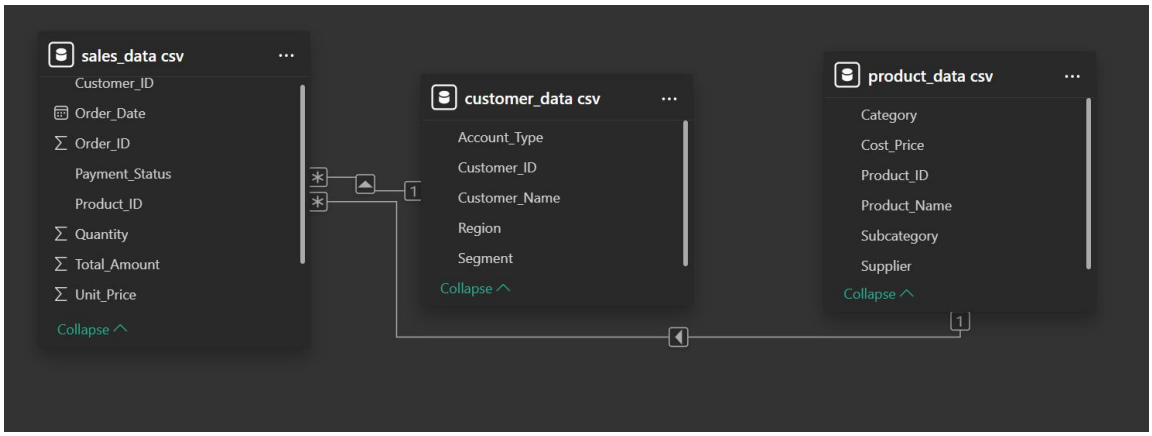

Figure 5: Data Model Relationships

UNIQUE POINTS

1. **Risk Identification:** Highlights $18K overdue automatically.
2. **Growth Story:** Visualizes 400% sales increase from Jan to Apr.
3. **SAP Alignment:** Follows SAP Business Data Cloud harmonization principles.
4. **Self-Service:** No ABAP code required for filtering.

FUTURE IMPROVEMENTS

- Live connection to SAP via OData.
- Predictive analytics for payment delays.
- Drill-down to individual customer orders.

CONCLUSION

This capstone project successfully delivers a complete, working sales analytics dashboard based on SAP Business Data Cloud principles.

The dashboard provides:

- Total Sales: $104,200 across 60 orders from January to April 2026
- 24 Active Customers with average order value of $1,737
- Clear visibility into $18,600 overdue amount (17.9% of sales) requiring action
- Regional performance comparison identifying North as top region ($30,800)
- Monthly trend showing strong 410% growth from Jan ($10,200) to Apr ($52,000)

All project requirements including ZIP file, GitHub repository, and this 5-page documentation have been completed. The project is original work created entirely by the undersigned using the attached CSV data files.

DECLARATION

I hereby declare that this project is my original work.
